

Lower Stout Park Beautification Project

Work is underway to transform the lower portion of Stout Park into a new space with beautiful plant material for year-round interest!

A new seating area will be provided for picnics and lunch breaks along with custom engraved brick pavers to adorn the walkways.

A focal point will be a unique custom water feature designed by a local artist utilizing the existing cistern well.

We are seeking donations, volunteers, and any and all help to realize our dream for Lower Stout Park!
